

How to Restore Your Backups

File Restore

To restore a file, select the virtual machine or container you would like and select the Backup tab. Select File Restore.

Under the backup archive, please select the file(s) you would like to restore. Select Download.

Full Disk Restore

To restore an entire virtual machine or container, select Restore.

Virtual Machine 118 [redacted] on node 'pve2' dev

Start Shutdown Migrate Console More Help
